

Advanced prostate cancer research study

Doctors are testing an investigational study medicine for advanced prostate cancer. You may be able to join the study if:

- Your prostate cancer has spread and
- You have been through chemotherapy.

Study-related treatment, imaging scans and doctor visits will be provided at no cost to you.

Allowing our research team to be part of your treatment journey would bring us one step closer to finding better treatment options for people with prostate cancer.

LEARN MORE

Ask your oncologist about the XALute Study or contact the study doctor to learn more.
